SOLAR PUMPING & STORAGE

# Property pre-inspection for Rural Water System's & Storage.

Buying rural property can be one of the biggest financial decisions you will ever make.

## Have you Considered?

- Do water bores have the supply & quality you require?
- Water supply & quality may not live up to the seller's information given.
- Un-equipped bores may be completely dry or collapsed.
- Water requirements for house, garden, stock?
- Water tank condition?

Conducting a rural water property inspection is essential, providing valuable information to protect your investment.

Midwest Groundwater can provide knowledgeable advice on water system set up provide free estimates for any work required.
